

# JINGLE JAMMED!

---

Hey there! Thank Jingle bells, you are here! The North Pole is in disarray, and we need all the help we can get! A massive storm has knocked out warehouses and factories, where Santa's little helpers make toys and store them for the big night. 3 major sites have been affected. We need you and your team to create whatever you can to make this holiday successful.

To make matters worse, the snow queen, Ms. Clauses cousin, is visiting this year, and her ice castle was wiped out! Also two Sailing ships from one of the other work sites have sunk in the storm, if you can please locate them. Any of the following you can construct will help. The elf repair teams are fast at work repairing the damages and restoring communications, but your help just may tip the scales in our favor. Also, the storm isn't done; **expect bad weather!**

## **Here is what we need:**

**Warehouses:** Some elf repair squads have already put some of the new warehouses up, but they are empty and need to be filled or repaired

**Toy Factory** – we need to restart production as soon as possible, build a toy factory to restart production

**Ice castle** - The Snow Queen needs a nice place to relax when she shows up. Make a castle next the ocean that that will make her feel welcome

**Housing** – the elves of course, live in the north pole the need more living space; this means housing!

**Utilities** – we need roads, or tracks (minecarts) ready to do transport between builds

**Santa's second home-** "Big Red" likes to check on all his worksites, the cozy home was buried under an avalanche, we need another one!

**Whatever you choose, start constructing, time is running out!**

**For the scavenger hunt look on the back**

# **SEARCH AND RESCUE!**

Find the following, report when you have found it!

(please don't destroy it when you find it)

- ⊞ Group of elves taking shealter in a cave
- ⊞ Group of elves teking shealter in the forest
- ⊞ A sunken ship with white sails
- ⊞ A sunken ship with black sails
- ⊞ What is left of Santa's old house

Number one rule? Respect eachother's Build!!
